# TRUMP: HANDS-OFF VENEZUELA!

We have already seen enough countries ripped apart at the behest of oil corporations and other oligarchic interests. In response to another unprovoked attack against another small oil-rich nation, the Emergency Hands-Off Venezuela Committee is formed to mobilize people of conscience into action. We demand an end to all hostile policies of the U.S. government against Venezuela and balanced coverage of what's going on there by corporate media outlets such as Univision.
