**Call to Black People's March on White House!!!  
Black Power Matters: Down with colonialism!  
Black Community control of the police!**

[Register for the Black People's March on the White House! Nov. 6-8, 2020](#)

The Black is Back Coalition for Social Justice, Peace and Reparations (BiBC) is calling on colonized and unrepresented people of the U.S. to join us Nov. 6-8 for the Black Power Matters march on the White House opposing the reactionary U.S. agenda being imposed on Africans and others within the U.S. and around the world.

Millions of people within the U.S. have been pushed out of legitimate political life by the rulers of this country. The two ruling parties have both put on their ritual shows called conventions, formally nominating their respective representatives for U.S. president and unveiling their two tame programs that represent the interests of one

single white colonial-capitalist ruling class.

More and more people have come to the conclusion that neither the Republican nor the Democratic Party represents the will of the people. However, most people feel that there is no other option than to vote for one or the other.

Many people, especially Africans, are being mobilized to vote because they are afraid of Donald J. Trump, the sitting Republican Party representative of the ruling class.

No matter what is exposed about the corruption and reactionary politics of Democratic Party candidate Joe Biden, many can see no alternative to “holding their nose” and voting for him in opposition to Trump’s reelection. This is despite Biden’s defining role in increasing the prison population in the U.S. by 500 percent, which, with the help of the Clintons and others, contributes to the mass incarceration of African people to the point that one in eight prisoners in the world is an African in the U.S.

The fact that Biden played a major role in unleashing the current version of police terror reigning supreme in our communities with his infamous “Crime Bill” is outweighed by fear of a reelected Republican Trump regime. The fact that Biden’s chosen running mate, Kamala Harris, has won the hearts of U.S. rulers as their enthusiastic top prosecutor in California, ruthlessly filling prison cells with Africans and other oppressed and working people is minimized by an assumption that voters are being forced to elect the “lesser of two evils.”

Our call to march on the White House on Nov. 8 is designed to give coherence to the great discord that has been experienced in the U.S. over the recent years, months and weeks. Millions of you who have never participated in protest in the past have come out to the streets in protest and outright rebellion because the nature of the

colonial-capitalist system is being exposed in bold relief daily.

Outright police murder of African people can no longer be ignored and tolerated by many. The colonialist-capitalist system is becoming increasingly terrifying in the middle of a pandemic where health care, like automobiles and refrigerators, is a commodity only available to the rich and where the colonized bear the brunt of the crisis.

The capitalist economy, based on profit and private ownership of the means of production, cannot provide security for the people. Joblessness with unproductive and underpaid employment is the order of the day and no empty promise of \$15 per hour over a number of years can ever begin to address the crisis for the oppressed. Meanwhile, trillions of public dollars are being shoveled into the coffers of Wall Street and the U.S. ruling class.

U.S. cities are being transformed by entire communities of homeless refugees living demoralizing lives of despair beneath highway overpasses where, if they are lucky, the city might pass out tents to qualifying wretches as if to ameliorate the results of ruthless gentrification that is too common in African and other colonized communities. An estimated 40 million people in the U.S. are facing eviction before the end of this year and thousands of cars line up daily across the country to receive meager supplies from food giveaways.

At the same time, the U.S. government of both parties is waging wars around the world in a desperate attempt to maintain its role as despotic hegemon.

U.S. special operations forces are initiating coups and engaging in other bloody, mostly secret counterinsurgent activities throughout the continent of Africa. They assault Africa confidently based on the assumption of no opposing constituency within the U.S. and because the two ruling parties represent a single white ruling

class that is united in preserving the system and U.S. world domination.

The Democratic Party has not voiced a single word of opposition to the starvation sanctions imposed on Zimbabwe and Venezuela or the low intensity warfare against the government of Iran currently occurring under the Trump Republican regime.

Both ruling parties attempt to divert the people's criticism of the domestic colonial military forces commonly referred to as police. Trump and Biden oppose even minor, cosmetic changes such as the symbolic call to "defund the police." They both liquidate the role of the police as an arm of the state with the proclamation that the majority of the police are honest, good people.

Both Trump and Biden refuse to call for Black community control of police as the logical interim movement to minimize police violence against Black people while negating the colonial domination of our people. Neither of them acknowledges the existence of the political prisoners, many of whom have been locked up for generations for fighting against the unjust colonial system that is finally coming into public view for many.

Despite the thousands of protests that have come to characterize this period, it is clear that the voices of the most dynamic sector of the population in the U.S. were not heard at the Republican or Democratic Party conventions and will never reach the agenda of either party.

Despite all the efforts being made to criminalize the ongoing independent mass expression of opposition to the current Trump regime and the existing system, the struggle continues, as it must.

This call by the Black is Back Coalition is a call to bring a coherent message of dissent. It is a call to give collective leadership to the spontaneity that has characterized much of our opposition up to now.

The Black is Back Coalition has a [National Black Political Agenda for Self-determination](#) that predates the 2016 election of Donald J. Trump and the fantastic protest and uprisings of today.

The National Black Political Agenda was forged during months of a democratic process with conventions in 11 states and the District of Columbia that culminated in a National Convention for Self-determination in Washington, D.C., during the Democratic Party Obama regime.

This is a call by the coalition for a massive turnout in November for the Black Power Matters March that also directs us to fight against colonialism and for Black community control of the police.

This is a call that puts the people in charge, as it should be, regardless of which ruling-class party or representative is in office. Regardless of whether you feel compelled by necessity to vote for Biden and Harris or to refrain from voting at all in the presidential election, this is a call to you to help shape our own independent agenda.

This is a call to cast your vote on Nov. 6-8 with your presence at the Black is Back Coalition mobilization. Because Black Power Matters! Down With Colonialism! Black Community Control of the Police!
