Join us as we demand a fair recovery from Hurricane Ida!

-> We need the people's control and oversight of Entergy. The company lied about being prepared, and now it wants ratepayers to foot the repair bill. This is costing more than money: most Ida deaths have been from heat exhaustion.

-> We need a rapid pre- and post-storm evacuation. After the storm, Cantrell spent 4 days cracking down on "looting" when she could've been mobilizing to get people out of the city.

-> We need real and accessible FEMA aid. FEMA discriminates against low-income, Black applicants. It doesn't have enough staff to respond to aid requests. It excludes many trans and gender non-conforming people because of their name changes.

We need a hurricane response by and for the people of this city.

Hold Entergy accountable!

Make FEMA pay!

Real relief NOW!
