No to U.S./NATO war: Here are the facts!

written by Socialist Unity Party
February 5, 2022

Left: U.S. Embassy in Kiev retweeted a Ukrainian official's post boasting of massive arms shipments. Right: A neighborhood pharmacy in Brooklyn, N.Y., on Feb. 2.

The corporate media and politicians claim that Russia is about to invade Ukraine. It's a big lie, just like the lie about Iraq's "Weapons of Mass Destruction." Actually, Washington is pushing U.S.-armed Ukraine to invade two small independent

republics, Donetsk and Lugansk, on Russia's border. They want to provoke a response from Russia to justify NATO intervention.

Fight COVID, evictions and poverty, not Russia

Workers are facing crises right here at home. Why is Biden preparing to send 8,500 additional U.S. troops to Europe on top of 64,000 already stationed there? Why did Congress raise Pentagon war funding when they can't even pass Build Back Better legislation or protect people's basic democratic rights, like the right to vote and reproductive rights?

Millions of \$\$ in bombs and bullets, can't deliver masks and tests

Between Jan. 21 and Feb. 1, the U.S. delivered 500 tons of weapons and military supplies to Ukraine. Yet many people have still not received their four free home COVID tests in the mail. Pharmacies have signs saying, "Free gov't masks not yet available." Imagine if Washington put the same effort into fighting the COVID pandemic and providing healthcare. How many of the nearly 1 million U.S. lives lost could have been saved?

Biden: Stop supporting Ukrainian fascists

Ukraine has sent white supremacists and neo-Nazis to the front line to threaten Russia and the residents of Donetsk and Lugansk. Biden went back on his promise to curb racist police violence against Black and Brown communities. Meanwhile the Pentagon is training and arming Ukraine's hate groups, who are no different than those who attacked the Capitol last Jan. 6.

Banks and Big Oil profit from Pentagon wars

U.S. Big Oil companies and banks want to stop the flow of Russian oil and gas to Western Europe. They want to force their European allies to pay extortionate prices

for U.S. fuel instead. We don't need another bloody war for oil profits!

U.S./NATO:
NO WAR on Russia & Donbass

Here are the facts!

The corporate media and politicians claim that Russia is about to invade Ukraine. It's a big lie, just like the lie about Iraq's "Weapons of Mass Destruction." Actually, Russia is responding to the U.S. and NATO's aggression against independent peoples' Republics, Donetsk and Luhansk, in Russia's border. They want to provide a response from Russia to justify NATO invasions.

Fight COVID, evictions & poverty, not Russia
Workers are facing crises right here at home. Why is Biden preparing to send 8,500 additional U.S. troops to Europe? Congress has already allocated \$100 billion to NATO members. Why did Congress vote Pentagon war funding when they can't even pass Build Back Better? Why are they attacking workers' basic human and constitutional rights, like the right to vote and reproductive rights?

Millions of SS in bombs & bullets but can't deliver masks & tests
Democrats say... and here's the U.S. government: 100 firms in 10 countries are making masks to U.S. specifications. 100 not received their first 400,000 COVID tests in the last. Pharmacies have signs saying, "Free giant masks not yet available." Imagine if Michigan put the same effort into fighting the COVID pandemic and providing healthcare. How many of the nearly 1 million U.S. lives lost could have been saved?

Biden: Stop supporting Ukrainian fascists
Ukraine has new ultra-supremacists, and new Nazis to the front line. The western fascists are now invading Ukraine and supporting Hitler's Nazis on the propaganda to stop racist police violence against Black and Brown communities. Meanwhile the Pentagon is training and arming Ukraine's hate groups, who are no different than those who attacked the Capitol last Jan. 6.

Banks & Big Oil profit from Pentagon wars
U.S. Big Oil companies and banks want to stop the flow of Russian oil and gas to Western Europe. They want to force their European allies to pay exorbitant prices for U.S. fuel instead. They don't need another bloody war for oil profits.
