Human Chain Connecting 2 Koreas Hands Connecting NK and SK UN Missions

Many declarations have been issued by North Korea and South Korea, but none has ended the Korean War. We are now facing a new regime in South Korea that is anti-reunification and will act as an apparatus to US foreign policy. The annual US wargames in South Korea must be stopped. Additional placement of the THAAD is unacceptable. They are in direct violation of the joint declarations. They will bring disaster not only to the US-North Korea relations but also to the peace and security of the people in the region and the world around us.

Please join our human chain connecting the North Korean and South Korean UN Missions!
