U.S. hands off Iraq, Syria, Yemen & Palestine!
Will the Pentagon attack Iran?

By Stephen Millies

After frame-up victims Ethel and Julius Rosenberg were executed in 1953, French philosopher Jean-Paul Sartre wrote that the capitalist United States was "sick with rabies."

Seven decades later, Wall Street's Big Oil empire is even more rabid and bloodthirsty. Using U.S.-supplied bombs and shells, the Zionist regime occupying Palestine has killed 30,000 people in Gaza. Behind the fascist Benjamin Netanyahu is Genocide Joe Biden.

In less than a month the Pentagon has attacked Iraq, Syria and Yemen, killing dozens with bombs and missiles. Over 106 million people live in these three sovereign countries.

Twenty-one years after the Second Gulf War, U.S. troops are still in Iraq despite the country's parliament demanding that they leave. The U.S. occupies oil fields in Syria and steals the petroleum.

Beginning in 2014, Saudi Arabia and the United Arab Emirates — both vassal states of Big Oil — invaded Yemen, killing 377,000 people before being beaten back. Meanwhile Yemen was blockaded by the U.S. Navy as its children starved.

Now the U.S. and Britain are bombing Yemen because the country has closed the Red Sea to ships owned by or going to apartheid "Israel." Yemen's people, led by the Ansarallah movement, are doing so in righteous solidarity with Gaza.

In the last week the Biden administration has struck Iraq and Syria over 75 times. A Feb. 7 attack killed two commanders of a resistance group in Baghdad. Iraqis responded by chanting "America is the devil."

The White House's excuse for these devilish attacks was a drone that hit a U.S. base in Jordan near the Syrian border on Jan. 28. Three Black GIs from Georgia were killed.

Emergency responders at the site of a burned vehicle hit by a U.S. drone strike in east Baghdad, Iraq, Feb. 7.
As with over 7,000 Black GIs killed in the dirty war against Vietnam and Laos, it's the Pentagon that has the blood of these three soldiers on its hands.

Demonizing the oppressed

The wealthy and powerful always slander freedom fighters. The U.S. State Department kept Nelson Mandela on its terrorist list until he was 89 years old.

The response of the Zionist state to the International Court of Justice chastising its crimes in Gaza was to attack the United Nations Relief and Works Agency. Netanyahu's regime claimed that a dozen of the UNRWA's 13,000 employees took part in the Oct.
