Maduro is a union bus driver.

The Bolivarian revolution raised the minimum wage along with raising the living standards of Venezuela's poor and working class.

No increase in the U.S. minimum wage of \$7.25 since July 24, 2009.

Venezuela's Bolivarian revolution gave away free heating oil to poor and working class people in the United States in the Bronx, Chicago and even to a homeless shelter in Maryland.

Who are in the streets for Maduro? Mostly working class Venezuelans the majority who are Black, Brown, and Indigenous.

Who are in the streets for the U.S. hand-picked (self-appointed) president, Juan Guaidó? Well-heeled, mostly better off middle class and wealthy Venezuelans.

Trump was elected through the electoral college, an artifact from the era of slavery. He did not win the majority votes, in fact, he received 3 million less votes than Clinton.

Trump is a billionaire businessman

U.S. bosses & billionaires want to control and profit from these resources with no concern for workers and poor people either in Venezuela or the United States.

These are just a few of the facts! What everyone should know is that U.S. imperialists, the big bankers and business owners, have been waging a covert and not so covert war against Venezuela which has included U.S. imposed economic sanctions costing Venezuela 30 million dollars per day, violent street protests including the attempted assassination of President Maduro, media lies, the illegal seizure of oil assets and much more. Under all of this pressure, the Bolivarian revolution has continued to stand. This makes the suggestion of open military aggression (a war) very dangerous. A war that just like Trump's stupid wall will cost us billions and more importantly will lead to the death and destruction of countless working class lives.
