
Havana, Nov. 16 — It was an all day ordeal on Monday, Nov. 15, on the U.S. side. We waited in grueling airport security lines and spent hours checking in. Two of our representatives barely got their passports. We had to get up at 5 a.m. and drive to the passport office in Miami and keep our fingers crossed.

But when we got to Cuba it was all worth it. On landing our spirits soared and our energy returned. Cuban people and their leaders were waiting at the airport, along with a bevy of news media. Our group was literally the first delegation to travel to the newly opened Cuba, which had been closed to international visitors because of the pandemic. Nov. 15 was the opening of schools and services in Cuba and is also a day celebrating the anniversary of Havana.

When we got to the Cuban Martin Luther King Center (yes, there is such a thing) young Cuban singers and musicians greeted us along with lo...
People before patents: Moderna’s ‘Grand Theft Vaccine’

By Stephen Millies

The World Health Organization estimates that 5.1 million people have died of the coronavirus. The Economist magazine claims that the real number of deaths may be three times as much.

Meanwhile Pfizer expects to rake in sales of $36 billion from its COVID vaccine in 2021. The collective wealth of Moderna’s three top shareholders — Noubar Afeyan, Robert Langer and Timothy Springer — ballooned to $12.7 billion because of vaccine sales. Moderna didn’t create its very effective vaccine by itself. The corporation, which has never brought out a pharmaceutical drug before, got $2.4 billion from the U.S. government to develop it. Uncle Sam paid Moderna $8.1 billion for a half-billion doses.

More importantly, it was scientists from the National Institutes of Health who helped design the genetic sequence used in Moderna’s vaccine. These NIH scientists were Dr. Kizzmekia Corbett, Dr. Barney Graham and Dr. John Mascola.

Yet when Moderna filed its patent application in July for the vaccine, these scientists weren’t mentioned. That’s particularly rotten in the case of Dr. Corbett, a Black woman. It’s not just a matter of stealing credit. Moderna wanted government money and crucial help from NIH scientists — and it didn’t want to share any of the profits.

Moderna has only sold a million vaccine doses to poor countries. It charged the African country of Botswana $29 per dose, a 79% higher price compared with its deal with the U.S. government.

That’s typical behavior for the big drug outfits known as Big Pharma. Every minute BioNTech, Moderna and Pfizer are together collecting $65,000 in profits from their COVID-19 vaccines, according to the People’s Vaccine Alliance. That amounts to $93.5 million per day. At the same time, just one out of fifty people in poor countries have been fully vaccinated.

Patent robbery = death

Patents are legal monopolies that are supposed to encourage innovation. The medical-industrial complex uses them to jack up prices on life-saving medications.

Take the EpiPen, which is a brand name for an injectable device that delivers the drug epinephrine to people suffering a severe allergic reaction. Access to EpiPens can mean the difference between life and death. Mylan Pharmaceuticals, which later merged with Upjohn to form Valeant, increased the price of EpiPens by over 500% between 2006 and 2016.

Insulin is a life-saving medication for millions of people with diabetes. The Canadian Dr. Frederick Banting discovered insulin along with James Collip and Charles Best in 1923.

Banting refused to put his name on the patent for insulin. He wrote that “insulin does not belong to me, it belongs to the world.” Banting’s two co-discoverers sold the insulin patent to the University of Toronto for one dollar.

That doesn’t prevent the drug outfits from increasing the average annual cost of insulin by over 15% since 2012. That’s an increase of three- and-a-half times in nine years.

By 2016 the average monthly cost of insulin had risen to $450 per month. As a result, one in four people using insulin have reduced their dosage. That’s why Minneapolis restaurant worker Alec Smith died in 2018, because he couldn’t afford insulin’s high cost.

It isn’t just insulin that’s over-priced. The communist activist David Schechter, a former math teacher and computer programmer, suffered a stroke because he couldn’t afford his high vision. He died eight years later in 2014.

Take over Big Pharma!

The failure to vaccinate billions of people in Africa, Asia and Latin America has allowed the coronavirus to mutate and create the dangerous Delta variant. In a world of jet planes and global supply chains, everyone has to be able to be vaccinated.

Meanwhile, the U.S. government is giving hundreds of millions of dollars to Moderna, Pfizer and other big companies to develop their drug. But it is also allowing those same companies to set the price of a life-saving vaccine.

If Moderna and its allies are the criminals, Big Pharma is the system that protects them. To defeat COVID-19, the power of the people has to be mobilized to smash the greed of Big Pharma and take over their patents.

RITTENHOUSE IS GUILTY! No justice, no peace! Smash white supremacy!

Continued from page 1

Empowering white supremacists

When then-President Donald Trump implied that Rittenhouse was acting in self-defense, that empowered his beloved Proud Boys. When the trial ended in Kenosha, officers there arrested Rittenhouse for his actions.

The inciting event in Kenosha that started this nightmare of racism was a Black Lives Matter march. The march was the racist police shooting of Jacob Blake by Rusten Sheskey, a white cop. Sheskey shot Blake in the back four times, then an additional three times in the side, simply because Blake was trying to get into his own car.

The cop also received no punishment. In October, the U.S. Department of Justice said it would not bring charges against this racist cop, who can clearly be seen on video unnecessarily shooting and attempting to kill Blake in front of his children.

The justified outrage and protest by the community after Blake’s shooting was met with heavy-armed police using tear gas and lethal force, while these same cops did nothing to stop the openly racist militia organizing with assault weapons to attack the protesters. This undoubtedly made Rittenhouse feel above the law and righteous in his white supremacy.

Rittenhouse felt invincible when he aimed his weapon at protesters while walking around to taunt them. When the cops offered him water, they knew he was being encouraged in his “sacred mission” — one he shared with the Proud Boys he later posed with.

After making bail, Rittenhouse was photographed in a bar flashing a white supremacist hand sign while standing next to high-ranking members of that group. That photo was not allowed as evidence to show his intent. Neither was a video where he proclaimed his desire to shoot “shoplifters.”

Right to self-defense against racist killers

During the trial it was made clear that Rittenhouse went into a community that was not his own to protect. It was a confrontation. Rittenhouse was driven for more than half an hour, across state lines, from his home in Illinois to Kenosha, where he stood in illegally possession of a military-style assault rifle with murderous intent.

The first person he shot and killed was Joseph Rosenbaum, whom Rittenhouse admitted was unarmed. In fact, the prosecution presented evidence from an FBI surveillance plane showing Rittenhouse following and confronting Rosenbaum. After the initial shot that brought Rosenbaum down, Rittenhouse continued shooting until he was dead.

This is what led to Rittenhouse being chased by those who put their lives on the line to protect the protesters against an active shooter. Another anti-racist protestor, Anthony Huber, who like Rosenbaum was white and concerned for the welfare of the mostly-Black participants in the rally, was also killed by Rittenhouse. Gaige Grosskreutz was shot and wounded.

Rosenbaum’s and Huber’s solidarity and courage demand justice, along with the community under siege by racist thugs and the police. These are the circumstances — who admitted he didn’t even care enough to watch the trial.

Justice Blake, uncle of Jacob Blake, said at a protest after the verdict: “This President Biden and Harris sold out our family, sold out the Floyds ... and the Taylor family. They said they were going to do things to square up what was going on in the African American community and have not, so jure satis like this will continue to happen ... this was
U.S. charges against Russia about space are height of hypocrisy

By Press TV

The U.S. charge that Russia is pol- lut ing space with orbital debris is the height of hypocrisy, according to politi- cal analyst Bill Dores.

Dores, a writer for Struggle-La Lucha and longtime antiwar activist, made the remarks in an interview with Press TV on Nov. 18 after the United States called a recent Russian anti-satellite missile tes "dangerous" and "provocative" claiming that it caused a debris field in space that forced astronauts aboard the International Space Station (ISS) to temporarily seek shelter.

"Price warned the test "will sig- nificantly increase the risk to astro- nauts and cosmonauts on the Inter- national Space Station, as well as to other human spaceflight activities.

"Russia's dangerous and irre- sponsible behavior jeopardizes the long-term sustainability of our outer space and clearly demonstrates that Russia's claims of opposing the wea- ponization of space are disingenu- ous and hypocritical," Price said.

Russia on Nov. 16 rejected U.S. ac- cusations that its missile test that struck a defunct space satellite poten- tially put astronauts aboard the ISS at risk.

"The Russian Ministry of Defense confirmed that it had "successfully conducted a test" to hit an old Russian sate- llite launched into orbit by the Soviet Union in 1982, according to reports.

"Price's charges against Rus- sia are the height of hypocrisy. Be- fore he went with the State Depart- ment, Price spent 10 years at the CIA. That agency uses spy satellites to fa- cilitate its covert wars and terrorist activity around the world. Lockheed Corporation, now Lockheed Martin, began building spy satellites under CIA direction in 1959," Dores said.

"The U.S. military is not only a massive theft of res- ources from human needs in the United States. It forces other coun- tries to divert their own resources in defense. And as the Russian test showed, if the U.S. continues to pursue this dangerous course, it will be answered," he said.

"Space exploration should be for the good of humanity and life on earth, not a means to destroy it. It should be an area of coopera- tion, not armed confrontation. The United States should shut down the Space Force and deactivates its military satellites before it's too late," Dores concluded.

Rittenhouse is guilty! No justice, no peace! Smash white supremacy!

Continued from page 2

a god-awful sight for the world to see, the racism and the underbelly of racism that runs throughout this country in every jurisdiction."

Both Democratic and Republican administrations have sold out the victims of racism and police terror by justifying away white supremacy in decline, where more vital services are being cut while poverty, home- lessness and sickness grow, sac- rificed at the altar of profit for the ultra-rich ruling class. The people's demands for healthcare and eco- nomic justice are met with repress- ion to discourage activism.

Repression includes the use of shock troops or extrajudicial entities, which are now covered by court cham- bers like that of Judge Bruce Schro- eder. After the exoneration of all charges, the judge said he "couldn't have handled more jury duty.

Cops, courts and Klan work in hand in hand

This judge — who screamed at the prosecution during the trial and had Trump rally music as his cell- phone ringtone that interrupted the prosecution during the trial — was confident in the outcome, since he suggested vital evidence and dis- missed the charges that had the best chance of conviction, like being in possession of an assault weapon while underage.

Yes, it's by design.

We need a better design of coor- dinated and unified activism, soli- darity and unity, especially with the most oppressed Black, Brown and Indigenous communities. We need a design to build the type of actions outside of the courtrooms and legis- lative halls that shut down business as usual, unify our working class and people's organizations like unions, support anti-racist and na- tional liberation struggles, women's struggles, LGBTQI movements, and provide defense from these emerging fascists empowered by racist judges and the white suprem- acist capitalist system.

The truth is that victories, like the conviction of George Floyd's killer Derek Chauvin, are vital and important to move forward. But it must be remembered that this vic- tory came from the militant pro- tests demanding it. As we have just seen, that progress can be stolen as soon as the local, state and federal government feel the heat of militant street activism is off.

Not only is it necessary to keep up the heat, but also to better un- derstand the necessity of bringing down this system that denies work- ing people a voice in government; allows the use of all-white or nearly all-white juries; denies our demand that the profits we create be used for responsible, effective and universal healthcare that could have prevent- ed most of the deaths from COVID-19 here in the U.S., instead of being used for imperialist war or racist police institutions that enable white su- premacists.

That's what socialism is all about — give workers and poor and op- pressed peoples the right to govern the profits they create for society, determine their own security forc- es, and eliminate those entities that protect and serve only the needs of the rich.

In the broad fight-back movement, we won't all have the same opinion on the type of government we need it. It should be an area of coopera- tion, not armed confrontation. The United States should shut down the Space Force and deactivates its mil- itary satellites before it's too late," Dores concluded.
NATO abuses refugees, threatens to ignite war on Poland/Belarus border

By Greg Butterfield

Nov. 11 — The U.S. and its European allies are staging a dangerous provocation at the border between Poland and Belarus, which threatens both a humanitarian catastrophe and a military conflict that could quickly explode into a wider war.

Tens of thousands of refugees, fleeing imperialist-fueled wars in West Asia and beyond, have gathered on the Belarusian side of the border, desperate to move to the Russian Federation and join their families. Poland’s far-right government — a NATO member, acting on behalf of Germany and other EU powers where the refugees wish to go — has responded with a massive buildup of military forces.

Polish border guards and troops have violently abused refugees who attempted to cross into the country. In one case, on Nov. 10, four Kurdish men were found beaten by Polish security forces. They were treated by Belgian doctors. The same day, a young boy was pepper-sprayed by the Polish border guards.

The Border Committee of Belarus stated: “All these people, including women and children, do not pose a threat to security and do not behave aggressively. According to the stories of the refugees themselves, they organized themselves into such a large group in order to prevent forcible displacement by the Polish side, as well as to draw the attention of the international community to the actions of Poland in terms of non-observance of human rights.

“Taking into account the statements of Polish officials about the concentration of armed forces and equipment near the border, we do not exclude provocative actions by the Polish side aimed at justifying the use of physical force and special equipment against just refugees,” the statement concluded.

The government of Belarus has called for high-level consultations to defuse the situation and resolve the crisis. So far, Poland has refused — with strong backing from its powerful U.S. and European sponsors.

Meanwhile, the Hidden administration, other Western governments and corporate media are spreading wild lies about supposed Belarusian government “trafficking” of migrants and refugees, reporting this as fact.

They claim this is a plot by President Alexander Lukashenko of Belarus to pressure Europe to lift brutal economic sanctions imposed because of the West, rather than the all-too-predictable outcome of Western military and economic interference in Syria, Iraq and Yemen, Afghanistan and North Africa.

Polish govt. vs. the people

While presenting a one-sided, hostile view of the Belarusian government and the refugees, these same governments and media actively cover up the behavior of the U.S. puppet regime in Poland, including its pro-fascist policies and its war on women’s reproductive rights, LGBTQ+ people, workers and communists.

In fact, while Western media were completely focused on presenting the Polish side of the border crisis, on Nov. 6 tens of thousands of women and supporters were protesting in the streets of Poland’s capital, Warsaw after a woman died of pregnancy complications as a result of U.S./European sanctions, like Venezuela and Cuba, into a toxic stew of war, conquest and regime change.

We have no firewood to keep warm, a young man on Nov. 10 said as he limped past a Polish checkpoint. “The government continues to bully us, instead of helping us. We have no shelter, no food.”

On Nov. 9, dozens of people protested outside the Polish Embassy in Minsk, the capital of Belarus. Signs and banners read: “Leopards [Polish tanks] against women and children!” “Stop genocide at the border!”

An EU Neanderthal regime at war with Belarus and the Communist Party, and ordinary workers.

One woman interviewed on the picket line condemned the hypocrisy of the Western powers: “Those people who say that some human rights are being violated in the world are violating them themselves, not allowing migrants to enter the EU. We are ordinary peaceful Belarusians who came out in support of ordinary people who do not deserve such an attitude.”

West escalates tensions

A new European Union threat to ban flights between West Asia and Belarus won’t just harm those countries’ economies, but may force thousands of refugees to make the dangerous journey to Europe across the Mediterranean, which has already cost so many lives in recent years. It is also, of course, an egregious violation of those countries’ independence, just like all U.S.-EU sanctions.

Responding to the threat of a fifth round of sanctions, President Lukashenko called for an impromptu stretcher from the side of the border. In a mixture of languages, he explains: the young man’s legs are lost, he can no longer walk.

“My God! We have six children. All are small. No food, no milk for them, no diapers. We have no firewood to keep warm, no tents to shelter from the rain, and we are not allowed into Europe,” says another man. He says that he and his family have already made several unsuccessful attempts to get into the EU.

Hard hit by Western sanctions, Belarus is ill-equipped to provide the necessary humanitarian support but is doing what it can. Border guards and soldiers are trying to maintain order and protect the refugees while attempting to negotiate with the Polish regime and the EU continue.

The government and people’s organizations, including the Belarusian Women’s Union and Communist Party of Belarus, have expressed solidarity with the refugees and are helping to provide them with food, water, shelter and health care.

At a meeting of government ministers Nov. 10, Belarus declared that the priority must be given to the needs of children and pregnant women at the border. Education Minister Igor Karpenko said Nov. 11 that children’s health camps and other facilities, established during Soviet times and still maintained in Belarus, would be organized to provide safe havens for them, including teachers for the children.

Continued on page 5
Luкашenко pointed out Nov. 11 that Europe’s main transnational gas pipeline, Yamal-Europe, goes through Belarus, and recently Rus sia has significantly increased the volume of gas transit to the West. “We provide heat to Europe, and they are threatening us with the border closure. What if we block natural resources? Therefore, I would recommend the leadership of Poland, Lithuanians and others to think hard before opening their mouths. They are up to them. They are welcome to close the border. The Ministry of Foreign Affairs should warn民政局 in Europe that they have to impose additional sanctions, ‘indis- gestible’ and ‘unacceptable’ for us, we will hit back.”

Struggle-La Lucha spoke with Na dezhda Sablina, a Minsk Pravda jour nalist and Belarusian representative of the Anti-Imperialist Front. She explained: “We saw last year, against the background of protests in Belar us after the presidential elections, Pol andian authorities transferred soldiers and arma ted equipment to its eastern borders. The troops stood ready ‘to come to the rescue’ of those who intended to overthrow Lukashenka here.”

The U.S. and EU are playing with the lives of refugees, the people of Belarus and the whole region, as well as working people in Europe who need access to affordable heat. A regional military conflict could quickly escalate into a full-blown international war between the U.S./NATO and Russia and its allies. We call on anti-war activists, advocates for refugees and migrant rights, and all progressive people to join us to demand:

**Solidarity with refugees!**

*From the European Union to the U.S.: LET THEM ALL IN!* **U.S./NATO, stop playing with people’s lives!**

**Stop provocative NATO war games in the Black Sea!**

**Hands off Belarus!**

Peoples Power Assembly, Baltimore
Solidarity with Novorossiya & AntiFascists in Ukraine

*The U.S. and EU often brandish charges of “human rights violations” against any government that resists to bend to their will, while they blatantly violate the human rights of refugees and migrants. This is true in Europe, just as it is in the U.S. with the racist Trump–Biden policies toward migrants and refugees from Central America, Haiti and elsewhere. The recent exposure of the horrific whippings of Haitian refugees by U.S. border agents show the depths of U.S. immigration policies.*

Belarus, recently the target of a failed “color revolu tion,” is being demonized like Cuba, Venezuela and oth er governments under U.S.–EU sanctions. Yet the cor po rate media buries the Polish government’s horrendous attacks on women’s reproductive rights and the promo tion of fascism by Poland and other regional regimes.

Sanctions are an act of war. Now the EU is using the threat of “secondary sanctions” against businesses and third countries, of the kind that have done so much damage to Cuba and Venezuela during the pandemic, to force airlines to ban residents of Afghanistan, Iraq, Syria, Yemen and other countries from flying to Belarus. The U.S. and EU are playing with the lives of refugees, the people of Belarus and the whole region, as well as working people in Europe who need access to affordable heat. A regional military conflict could quickly escalate into a full-blown international war between the U.S./NATO and Russia and its allies.

We call on anti-war activists, advocates for refugees and migrant rights, and all progressive people to join us to demand: **Solidarity with refugees!**

*From the European Union to the U.S.: LET THEM ALL IN!* **U.S./NATO, stop playing with people’s lives!**

**Stop provocative NATO war games in the Black Sea!**

**Hands off Belarus!**
Reportaje desde la Habana:
A pesar del bloqueo de EE. UU., Cuba ha vacunado al 90% y se abre a visitantes del mundo

Lars Bertling, Russell McClain y Sharon Black, tres reporteros de Struggle-La Lucha, miembros del Partido Socialismo Unido y representantes de la Asamblea del Poder Popular de Baltimore están participando en la 39ª Caravana de la Amistad USA-Cuba IFCO Pastores por la Paz.

Habana, 16 de noviembre — Fue difícilísimo todo el día el lunes 15 de noviembre en el lado estadounidense. Esperamos en las agotadas filas de seguridad del aeropuerto y pasamos horas registrándonos. Dos de nuestros representantes a duras penas obtuvieron sus pasaportes. Tuvimos que levantarnos a las 5 a.m. y conducir hasta la oficina de pasaportes en Miami con la esperanza de no perder nuestros pasaportes.

Pero cuando llegamos a Cuba, todas estas dificultades valieron la pena. Al aterrizar, nuestro espíritu se aligeró y nuestra alegría regresó. El pueblo cubano y sus líderes esperaban en el aeropuerto, junto con un grupo de medios de comunicación. Nuestro grupo fue literalmente la primera delegación en viajar a Cuba tan pronto se dio la apertura, luego de haber estado cerrada a visitantes internacionales debido a la pandemia. El 15 de noviembre fue también la apertura de escuelas y servicios en Cuba y adquirir para un día de celebración por el aniversario de la Habana.

Cuando llegamos al Centro Cuba no Martin Luther King (si, existe tal centro), jóvenes cantantes y músicos cubanos nos saludaron junto con la comunidad local de Marianao, líderes políticos y representantes del Centro MLK. Hoy martes, fue nuestro primer día completo de aprendizaje y visitas. Como nuestro grupo era grande, más de 70 personas, nos dividimos.

Memorial de la Denuncia
La mayoría de las personas que vienen en los EE. UU. solo equiparan el terrorismo con los ataques del 11 de septiembre. Es una triste hipocresía. Muchos más cubanos, muchos de ellos niños pequeños, han muerto en ataques terroristas. Solo que esos ataques fueron perpetrados por el Pentágono, la CIA, la derecha e imperialismo estadounidense. Este moderno museo documenta esos innumerales ataques.

La entrada tiene un recuadro rotatorio actualizado del número de personas que han perdidido la vida a causa del terrorismo. Esto no incluye a los afectados por el bloqueo, sino estrictamente a las víctimas de bombas de guerra y actos violentos de terrorismo. Hoy la cuenta es de 4,076.

Hubo 637 (conocidos) intentos de asesinar a Fidel; 21 ataques aéreos de la CIA; 11 bombarderos de la CIA; y 581 ataques terroristas contra misiones cubanas en el exterior. Una película especial documenta el bombardeo del carguero francés La Coubre ocurrido el 4 de marzo de 1960 en el puerto de la Habana y la consiguiente pérdida de 120 vidas. Fidel y el Che encabezaron las marchas callejeras masivas para honrar a quienes perdieron la vida y desafiar al imperialismo estadounidense. Las familias de las víctimas aún lamentan su pérdida.

El terrorista y agente de la CIA Luis Posada y sus cómplices, que estaban todos protegidos en los Estados Unidos, se jactaron del cobarde sabotaje de cultivos agrícolas, destrucción de la industria porcina y sabotaje de cultivos agrícolas. Estos son solo algunos ejemplos. En el Memorial le conmovió y cambió su opinión sobre quiénes son los verdaderos terroristas.

Instituto Finlay de Vacunas
Nuestra siguiente parada fue el Instituto Finlay de Vacunas que ayudó a producir tres vacunas COVID-19 cubanas: Soberana 02 y Soberana Plus. Tantas cosas se destacaron en la discusión y presentaciones de los representantes del Instituto. Bajo las condiciones más difíciles debido al bloqueo, Cuba pudo producir estas tres vacunas altamente efectivas, rivalizando en eficacia con la vacuna de Pfizer y Moderna.

En Cuba se produjeron 15 millones de dosis de estas vacunas, el 90% de la población está vacunada. Esto no parece que pueda suceder en el mundo occidental, donde la vacunación aún es un tema polémico.

Cuba reopens to visitors
Despite U.S. blockade, 90% vaccinated

Continued from page 1

ness of U.S. vaccines. The blockade had prevented Cuba from importing the reagents necessary for the production of the vaccine. And international patent restrictions blocked Cuban scientists from sharing important information.

In addition, it was nearly the first time that Cuba had to produce a vaccine aimed at a virus (not a bacterial infection) and they were able to do it in a very short time. So you might consider it a miracle. What did they do it?

One of the major reasons given was the cooperation between Cuban organizations, the lack of competition and personal profit. In fact, these were some of the same reasons, along with a few others, for the high vaccination rate in Cuba that has now reached an astounding 90% of the population.

Russell McClain y Cail Walker comentan la exposición sobre la guerra biológica de la CIA contra Cuba.

Los guías cubanos en el Memorial de la Denuncia hablan del museo que documenta las 3.678 personas que han muerto a causa del Pentágono, la CIA y la derecha e imperialismo estadounidense. Este moderno museo documenta esos innumerales ataques. La entrada tiene un recuadro rotatorio actualizado del número de personas que han perdido la vida a causa del terrorismo. Esto no incluye a los afectados por el bloqueo, sino estrictamente a las víctimas de bombas de guerra y actos violentos de terrorismo. Hoy la cuenta es de 4,076.
